About Us	NSEI is an NGO headquartered in Do	doma city and operates in all	zonal regions on Tanzania's
	mainland. It was founded on July 22nd, 2019—by a group of patriotic youth science expe		
	registered under the NGO act 2002 s	ection 11(1) and 17(2) act no	.24 as Future Scientists with
	Athleticism (FSWA)—with registration		
	00NGO/R1/00477 on Feb 29th, 2022.		5 .
	The organization envisions sustainable	e and promising socio-cultural	and enhanced human living
	standards: hence devoted to establishing		
	advance native technologies by indige		•
	environment and socio-cultural conce	· ·	• .
	develop parallel with modern science	s), and integrating the two—c	oncerning numanity, cultural
	values, and ecological safety.		
	To set up these professionals, NSEI fost	,	
	bonding fundamentals, and career d	·	and youth—through three
	strategies: education, research, and div	verse innovations.	
	Native Technologies are highly-advan	ced technologies: for enhanci	ng socio-cultural and human
	living standards—achieved from co	nvoluted indigenized moderr	n science technologies and
	modernized indigenous knowledge—co

Philosophy	Science should manifest the real world, observe and reflect the nature of the social universe, and		
i imosopii,	concern humanity, cultural values, and ecological safety.		
Core Values	Our values emerged from science, professionalism, service, and human values: Integrity, Inclusion		
Core values	Dignity, Love, Accountability, Responsibility, Relevance, Creativity, Excellence, and Growth.		
F da a tala			
Fundamentals	Natural life, Socio-Cultural, Research, and Innovation are our core fundamentals— they refl		
	Natural, Socio-human, and Formal science essentials.		
Justification	Science and technology intimately integrate the whole social structure and cultural traditions—since		
(Why we Do)	they manifest facts, ideas, beliefs, and knowledge towards the social universe—as both advance		
	societies by combating societal challenges, realizing human needs, and enhancing living standards As the culture, environment, and life perspectives differ within the societies, not all innovations technological aspects are applicable and convenient to all socio-cultural diversities. He		
	regardless of how advanced they are, technologies and innovations should adapt to corresponding		
	societal concerns and living needs—concerning humanity, cultural values, and ecological safety.		
	Throughout history and up to date, indigenous knowledge and perspectives have been empirical,		
	flexible, and substantial in providing problem-solving strategies for local communities—at cost-		
	effective with a comprehensive understanding of the native environment and cultural traditions. So,		
	rather than ignoring or overwhelming them, it is inevitable to optimize, justify, and systematize the		
	convenient ones: to co-exist and develop parallel with modern innovations and technologies.		
	Here comes the need of the professionals—scientists and science careers—with the potential to		
	indigenize modern sciences, modernize indigenous knowledge, and integrate the two: to advance		
	highly native technologies.		
Strategies and	Approaches and Strategies:		
Approaches	1. Promote modern and indigenous scientific fundamentals literacy to children and youth		
	through practical education. (EDUCATION)		
	2. Achieve scientific research and practices to explore nature, systematize knowledge,		
	combat issues, and establish technologies. (RESEARCH)		
	3. Practice and foster the integrated scientific innovation elements; and nurture the youth's		
	potential in provoking native technologies. (INNOVATION)		
	Approaches Toward Native Technologies		
	1. Indigenizing Modern science technologies.		
	Modernizing Convenient Indigenous knowledge.		
	3. Convoluting indigenous and modern sciences.		
Global Goals	2030 Sustainable Development Goals (N-SDGs)		
and Agenda	SDG#1—No poverty		
J	SDG#3— Good Health and Well Being		
	SDG#4— Quality Education		
	SDG#9— Industry, Infrastructure and Innovation		
	SDG#11— Sustainable Cities and Communities		
	SDG#12— Responsible Consumption and Production		
	2063 African Agenda (N-2063 AA)		
	<ul> <li>ASPIRATION#1—A Prosperous Africa based on Inclusive Growth and Sustainable         Development     </li> </ul>		
	ASPIRATION#4—A Peaceful and Secure Africa		
	ASPIRATION#5—An Africa With a Strong Cultural Identity, Values and Ethics		
	ASPIRATION#6—An Africa Where Development is People-Driven, Relying Particularly On		
	The Potential Of Youth		

Core	1. STEMA/STEAM Education (STEMA.EDU): A Cognitive program for assisting children: to	
Programs	explore and develop STEM and Art fundamentals' literacy, knowledge application,	
	innovation, and career development skills.	
	2. Modern Indigenous Knowledge page (MIK): A Program to modernize—justify, promote,	
	optimize, and systematize —convenient (ancient and recent) indigenous knowledge and	
	practices—to co-exist, develop parallel, and incorporate modern sciences.	
	3. Socialized Science Pro (S <sup>2</sup> P): A program to achieve a scientist or science career professional	
	with enhanced social bonding skills.	
	4. The Green Seedlings: A program to mature youth's scientific ingenuity through fostered	
	integrated innovation elements and nurture the indigenous innovations in advancing native	
	technology.	
Fundraising	1. Retail Sales: NSEI SHOP	
Services	2. Consultation: ICT Solution Services, STEMA/STEAM Development, and MEL in Sciences	
	3. Training and Workshops: Socio-Cultural Psychology, Child-Athleticism, and R&D	
	4. Online Publications: Blog, Mobile App, and Online TV	
	5. Innovations and Technologies: Engineering, Ecological Medicine, Indigenous Innovations,	
	and <u>NSEI Neural Net</u>	
Membership	Types of Membership	
	1. Founder Members: Founder individuals	
	2. Ordinary Members: Legal entity adhere to the vision and purpose of organization	
	3. <u>Associate Members:</u> Cooperates/ Partners (Individuals, Institution, Companies,	
	Government, Organizations and Non organizations)	
	4. Honorary Members: Advisors, Consultants and Positive contributors
